### LIMITATIONS:

Visible brushstrokes are a characteristic of metallic and pearlescent paints and it is for this reason that we do not recommend application with a paint roller. Do not apply in high humidity, below 50°F or above 86°F, or when temperatures are expected to drop below 50°F within the next 4 hours.

## PREPARATION:

### NEW/UNPAINTED SUBSTRATES:

Substrate should be a clean well-held surface free from loose material, dirt, grease, oil and mold. Dust down before proceeding. On bare surfaces such as new unpainted plasterboard sheeting, render, brick or timber, spot prime all joints and repaired areas with Sydney Harbour's Limeproof Undercoat Sealer, then apply two coats of same to entire area. Touch dry 2 hours. Allow 6 hours dry time between coats, and 6 hours dry time when painting is complete.

On bare metallic surfaces, apply a suitable metallic primer (anti-corrosive), then apply two coats of Sydney Harbour's Universal Primer. Touch dry 2 hours. Recoat 6 hours. Allow to dry 24 hours. On galvanized iron only Universal Primer is necessary.

### PREVIOUSLY PAINTED SUBTRATES:

Previously painted surfaces with loose, peeling or flaking paint must be made sound by scraping off loose paint. Fill nail holes and cracks with suitable filler, sand and dust off. Spot prime all joints and repaired areas with Sydney Harbour's Limeproof Undercoat Sealer, then apply one coat to entire area. Touch dry 2 hours. Allow 6 hours dry time.

## APPLICATION:

Stir thoroughly prior to use. Apply two coats by brush or spray. When painting broad wall areas using a brush, best results are achieved by laying off or reworking paint as applied (usually in a vertical direction) to achieve a smoother effect. Spraying will achieve a finer smoother effect than brushing. Touch dry in 1 hour. Allow minimum 4 hours dry time between coats. Allow total 6 hours dry time.
